OBJECTIVE

B.Tech CSE (AI) student aspiring to a Full Stack Developer role, with strong backend development and problem-solving skills and hands-on experience building APIs, web applications, and machine learning projects. Currently exploring Generative AI.

EDUCATION

University of Lucknow — B.Tech, Computer Science & Engineering (AI)

2025 – 2029

CGPA: 7.2 | Class XII: 90% | Class X: 85%

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

Frontend: HTML, CSS, JavaScript

Backend: FastAPI, REST APIs

Database: PostgreSQL

AI / ML: Machine Learning, Deep Learning, NLP, Transformers, TensorFlow, Scikit-learn, XGBoost, NumPy, Pandas, Matplotlib, Seaborn

Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook, Google Colab, PyCharm, IntelliJ IDEA

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

PROJECTS

Reelist — Full-Stack Movie Recommendation System

FastAPI, Python, NLP, TF-IDF, HTML, CSS, JavaScript, TMDb API, Render

- Developed a full-stack web application using FastAPI with an HTML, CSS, and JavaScript frontend.
- Implemented NLP-based movie recommendations using TF-IDF similarity.
- Integrated the TMDb API for movie metadata, posters, search, and recommendations, with a local movie catalog fallback when the API is unavailable.

Night Check-In — Airbnb Room Type Predictor

Python, Scikit-learn, Pandas, NumPy, FastAPI, Pydantic, HTML, CSS, JavaScript, Render

- Built an end-to-end machine learning web application that predicts Airbnb room types from listing, location, pricing, review, and availability features.
- Designed a FastAPI REST API with Pydantic validation to serve model inference.
- Created an interactive frontend and deployed the application on Render.

Student Mental Health Signal — Student Wellness Analytics

Python, Pandas, NumPy, Scikit-learn, FastAPI, Pydantic, Joblib

- Developed a machine learning-powered student wellness analytics application with a web interface for collecting student-related inputs.
- Built a FastAPI backend serving a trained model via Joblib, with Pydantic input validation.

Chatting Application

- Developed a chatting application as a personal project.

DSA & PROBLEM SOLVING

- Solved 80+ programming problems: 70 on LeetCode and 10 on GeeksforGeeks.
- Primary DSA language: Java.

HACKATHON & ACHIEVEMENTS

- Qualified in Smart India Hackathon (SIH) 2026 as Team Leader.
